Research reports

Dextran, a hapten carrier in immunoassays for s-triazines. A comparison with ELISAs based on hapten-protein conjugates
M. Böcher, T. Giersch and R.D. Schmid (Germany) 1

An ELISA utilizing immobilised snowdrop lectin GNA for the detection of envelope glycoproteins of HIV and SIV
N. Mahmood and A.J. Hay (UK) 9

Production of epitope specific monoclonal IgG antibodies to HLA class II molecules by combining in vivo and in vitro immunization
J.S. Petersen and T. Dyrberg (Denmark) 15

Studies of the low dose 'hook' effect in a competitive homogeneous immunoassay
S.A. Fernando, J.R. Sportsman and G.S. Wilson (USA) 27

Studies of the 'hook' effect in the one-step sandwich immunoassay
S.A. Fernando and G.S. Wilson (USA) 47

Multiple epitope interactions in the two-step sandwich immunoassay
S.A. Fernando and G.S. Wilson (USA) 67

A simple approach to improving sensitivity in a one-step monoclonal antibody-based ELISA for human IIbIIIa using multiple conjugates
A.M. Rowland, M.A. Wooldridge, K.A. Rosenthal and W.L.T. Wong (USA) 87

Evaluation of labelled monoclonal antibodies by simultaneous estimation of the association constant, the immunoreactive fraction, and the number of effective binding sites on the specific target
J.G. Fjeld and A. Skretting (Norway) 97

Electroporation of CTL clones: a useful method to investigate signalling pathways leading to the expression of effector functions
C. Langlet and A.-M. Schmitt-Verhulst (France) 107

The natural anti-α-galactosyl IgG in seminal fluid. A simple means to determine damage to the blood-genital tract barrier in infertile males
U. Galili, M. Ron and R. Sharon (Israel) 117

A simple technique for the determination of κ and λ immunoglobulin light chain expression by B cells in whole blood
W.M. Reynolds, A.M. Williamson, G.J. Smith and A.C. Lane (UK) 123

Measurement of PAF in blood by radioimmunoassay. Examination of interfering factors and problems involved in accurate quantification
S.J. Cooney, M.A. Smal and B.A. Baldo (Australia) 131

Use of soluble recombinant TNF receptor to improve detection of TNF secretion in cultures of tumor infiltrating lymphocytes
P. Hwu, S. Schwarz, M. Custer, C.A. Smith, J.J. Mulé and S.A. Rosenberg (USA) 139

Monoclonal antibody mediated targeting of enzymes. A comparative study using the mouse spleen as a model system
N. Van Rooijen, H. Ter Hart, G. Kraal, N. Kors and E. Claassen (Netherlands) 149

Analyses of affinity distributions within polyclonal populations of antigen-specific antibodies. Evaluation of their accuracy in population detection using monoclonal antibodies
U. Bruderer, M. Deusinger, U. Schürch and A.B. Lang (Switzerland) 157

Production and characterisation of monoclonal antibodies against native and disassembled human catalase
E.A.C. Wiemer, R. Ofman, E. Middelkoop, M. De Boer, R.J.A. Wanders and J.M. Tager (Netherlands, Belgium) 165

The development of a quantitative assay for the detection of anti-Ro/SS-A and anti-LA/SS-B autoantibodies using purified recombinant proteins
C.H.A. Veldhoven, J.F. Meilof, J.G. Huisman and R.J.T. Smeenk (Netherlands) 177

In situ immunocytochemical detection of cells containing antibodies specific for *Eimeria tenella* antigens
L. Vervelde, A.N. Vermeulen and S.H.M. Jeurissen (Netherlands) 191

Production of a functional monoclonal antibody recognizing human colorectal carcinoma cells from a baculovirus expression system
M. Nesbit, Z.F. Fu, J. McDonald-Smith, Z. Steplewski and P.J. Curtis (USA) 201

Solid phase enzyme immunoassay of cyclic adenosine 3′,5′-monophosphate. Effect of coating strategy upon assay performance in comparison with radioimmunoassay
J. Linden, G.E. Vandenhoff, D. Taylor and G.L. Finkelstein (USA) 209

The effect of the temperature and duration of sample storage on the measurement of lymphocyte subpopulations from HIV-1-positive and control subjects
T. Ekong, A.M. Hill, M. Gompels, A. Brown and A.J. Pinching (UK) 217

A simple enzyme-linked immunosorbent assay (ELISA) for the neuron-specific γ isozyme of human enolase (NSE) using monoclonal antibodies raised against synthetic peptides corresponding to isozyme sequence differences
M.E. Duncan, S.M. McAleese, N.A. Booth, W.T. Melvin and J.E. Fothergill (UK) 227

An immunochemical analysis of the human nuclear phosphoprotein p53. New monoclonal antibodies and epitope mapping using recombinant p53
B. Vojtěšek, J. Bártek, C.A. Midgley and D.P. Lane (UK, Czechoslovakia) 237

Fluorometric determination of the DNA content of cells cultured in tissue culture plates
M. Goppelt-Struebe and M. Golombek (Germany) 245

Avidin-binding to peripheral blood B lymphocytes and monocytes
C. Andreoni and M. Delaage (France) 249

A modified colorimetric method for the measurement of phagocytosis and antibody-dependent cell cytotoxicity using 2,7-diaminofluorene
S.J. Gebran, E.L. Romano, H.A. Pons, L. Cariani and A.N. Soyano (Venezuela) 255

A novel B cell stimulation/proliferation assay using simultaneous flow cytometric detection of cell surface markers and DNA content
J. Storek, I. Schmid, S. Ferrara and A. Saxon (USA) 261

Improved enzyme immunosorbent assay for mouse prolactin using penicillinase as label
Y. Tomita, R.W. Engelman, I. Bauer-Sardina, N.K. Day and R.A. Good (USA) 269

A polymerase chain reaction assay for the detection and quantitation of cytokine gene expression in small numbers of cells
S.R. Carding, D. Lu and K. Bottomly (USA) 277

A blocking ELISA for the detection of specific antibodies to bovine ephemeral fever virus
H. Zakrzewski, D.H. Cybinski and P.J. Walker (Australia) 289

A method for the detection of serologically crossreacting antigens both within and between protein mixtures: the Western cross blot
P. Hammerl, A. Hartl, J. Freund and J. Thalhamer (Austria) 299

Short communication

A simple method of concentrating monoclonal antibodies from culture supernatant by ultrafiltration
K. Saha, R. Case and P.K.Y. Wong (USA) 307

Letters to the editors

Factors influencing computer-assisted video image analysis of immunocytochemically stained lymphocytes and macrophages in the spleen of mice
W. Baumgärtner, E. Atzpodien, H. Weintraut and G. Seibold (Germany) 309

The L929 cell bioassay for murine tumour necrosis factor is not influenced by other murine cytokines
P. Tomkins, K. Cooper, D. Webber and G. Bowen (UK) 313

Announcement 317
